

LLM Resume Documentation

A comparative study of AI-assisted resume generation
using two large language models

Eman Torr G. Berjame
BS Information Technology · Ateneo de Davao University
2026

Prompt

The same prompt was submitted to both language models without modification. It was written to be specific about content, layout, and design so that differences in the outputs would reflect each model's interpretation rather than missing instructions.

Create a one-page, professional resume as a PDF for an entry-level software developer role with the following details:

Candidate: Eman Torr G. Berjame | emantorrberjame@gmail.com | 0908 715 9548 | Davao City, Philippines

Education (reverse chronological): Ateneo de Davao University – BS Information Technology, 2023–Present; Philippine Nikkei Jin Kai International School – Senior High School, 2021–2023; Philippine College of Technology – Junior High School, 2017–2021; San Roque Central Elementary School, 2012–2017.

Skills: HTML5, CSS3, JavaScript (ES6+), React.js, Bootstrap, Tailwind CSS, Python, Java; MySQL, Firebase; Git, GitHub, VS Code, Figma, Chrome DevTools, npm, Vite; Responsive design, REST APIs, OOP, debugging; Agile teamwork, problem-solving, attention to detail.

Projects: AdDU Cateneo (Front-end Developer, SAMAHAN) – React.js + Tailwind, REST API integration, team collaboration. AdDU Echoes Website – Figma to code, HTML/CSS/JS, cross-browser compatibility. Genshin Impact Quiz Game – Vanilla JS, DOM manipulation, timer logic, score tracking.

Design: Navy and white color scheme. Bold name header centered at top with contact info below. Thick navy rule under name; thin navy rules under each section heading. Section headings in uppercase navy: PROFILE, EDUCATION, SKILLS, PROJECTS & EXPERIENCE. Two-column layout for skills. Bullet points for project descriptions (2–3 per project, achievement-oriented). Italic 'References available upon request' footer. Fits exactly one US Letter page.

LLM Outputs

Below are the actual outputs produced by each model in response to the same prompt. No edits were made to either resume before capturing these screenshots.

LLM #1 — Claude (claude-sonnet)

Eman Torr G. Berjame

emantorrberjame@gmail.com • 0908 715 9548 • Davao City, Philippines

PROFILE

Motivated Computer Science student at Ateneo de Davao University with hands-on experience building responsive, user-friendly web applications. Adept at translating design mockups into clean, semantic code and collaborating in team environments. Eager to contribute technical skills and grow as an entry-level software developer.

EDUCATION

Ateneo de Davao University — BS Computer Science | 2023 – Present
Philippine Nikkei Jin Kai International School — Senior High School | 2021 – 2023
Philippine College of Technology — Junior High School | 2017 – 2021
San Roque Central Elementary School | 2012 – 2017

SKILLS

Languages & Frameworks - HTML5, CSS3, JavaScript (ES6+) - React.js, Tailwind CSS - Python, Java (foundational) Tools & Platforms - Git & GitHub — version control - VS Code, Figma, npm / Vite	Concepts & Practices - Responsive & mobile-first design - REST API integration & JSON handling - Object-oriented programming (OOP) Soft Skills - Team collaboration & Agile workflow - Problem-solving, detail-oriented
--	---

PROJECTS & EXPERIENCE

AdDU Cateneo | Front-end Developer, SAMAHAN — Ateneo de Davao University

- Built and maintained responsive UI components for the official SAMAHAN student council platform using React.js and Tailwind CSS.
- Collaborated closely with designers and back-end developers to deliver accessible, pixel-perfect web pages.
- Integrated REST API endpoints to serve dynamic content and improve overall site performance.

AdDU Echoes Website | Personal / Academic Project

- Designed and developed the AdDU Echoes publication website using HTML5, CSS3, and JavaScript.
- Created Figma prototypes and translated designs into clean, semantic, cross-browser-compatible code.

Genshin Impact Quiz Game | Personal Project

- Developed an interactive trivia game in vanilla JavaScript with dynamic question rendering, timer logic, and score tracking.
- Applied DOM manipulation and event-driven programming to create smooth animated UI transitions.

References available upon request.

Figure 1. Resume output generated by Claude. Navy color scheme, two-column skills layout, and section rules applied as specified in the prompt.

EMAN TORR G. BERJAME

emantorrberjame@gmail.com | 0908 715 9548

PROFILE

Motivated and detail-oriented aspiring software developer with a strong foundation in web development and programming. Passionate about building user-friendly applications and continuously learning new technologies. Seeking an entry-level opportunity to apply technical skills and contribute to innovative projects.

EDUCATION

Ateneo de Davao University (2023 – Present)
Philippine Nikkei Jin Kai International School (2021 – 2023)
Philippine College of Technology (2017 – 2021)
San Roque Central Elementary School (2012 – 2017)

SKILLS

Programming Languages: JavaScript, Python, Java, HTML, CSS
Web Development: Responsive design, front-end development, basic back-end concepts
Frameworks & Libraries: React (basic), Bootstrap
Tools & Technologies: Git, GitHub, VS Code, Chrome DevTools
Database Basics: MySQL, Firebase (introductory)
Other Skills: Problem-solving, debugging, teamwork, adaptability

PROJECTS / EXPERIENCE

AddU Cateneo – Front-End Developer (SAMAHAN)

- Developed and maintained front-end components for a university-based platform
- Collaborated with a team to improve user interface and user experience
- Ensured responsive design across devices

AddU Echoes Website

- Contributed to the development of a content-driven website
- Implemented clean UI layouts and improved site navigation
- Assisted in optimizing performance and usability

Genshin Quiz Game

- Designed and developed an interactive quiz game using JavaScript
- Implemented scoring logic and dynamic question rendering
- Focused on user engagement and smooth gameplay experience

Figure 2. Resume output generated by ChatGPT. Plain black-and-white layout: design specifications were not applied.

SECTION 3

Comparison Table

The table below rates both outputs across four criteria on a 1–5 scale (5 = best). Scores reflect how closely each output followed the prompt and how polished the result was.

Criteria	LLM #1 — Claude	LLM #2 — ChatGPT
Structure	5 / 5 Proper section order, two-column skills, visual hierarchy throughout	3 / 5 Logical order but single-column, no visual differentiation between sections
Clarity	4 / 5 Achievement-oriented bullets with specific tools and outcomes mentioned	3 / 5 Bullets were task-based and generic; lacked measurable or specific outcomes
Formatting	5 / 5 Navy theme, centered header, section rules, italic footer — all as specified	2 / 5 Plain black text, no color, no rules, no design elements applied
Overall Quality	5 / 5 Near-final output; required only minor wording refinements	3 / 5 Functional as a draft but needed significant design and content work

Reflection

Between the two outputs, Claude handled the task noticeably better. The main reason was that it actually produced a formatted PDF following the design instructions, navy color scheme, rules between sections, a centered bold header, two-column skills layout, rather than just placing the content as plain text. For a resume, presentation is just as important as content, so that gap mattered a lot.

The most visible difference was in how each model wrote the project descriptions. ChatGPT went with task-based bullets things like 'collaborated with a team' or 'implemented clean UI layouts', which tell you what was done but not why it mattered. Claude framed them around outcomes and specific tools, which reads more like a real professional's resume rather than a class assignment summary.

For the final version, I refined the profile paragraph slightly and adjusted a couple of bullet points that still felt a bit vague. The education section was also reviewed for accuracy. The core layout from Claude's output was solid, so most of the editing was just tightening the language.

What I took away about prompting is that specificity matters more than I expected. Giving both models the same detailed instructions, two-column layout, thick rule under the name, achievement-oriented bullets, resulted in very different levels of compliance. One followed through, one largely ignored the design side. That's not really about which model is smarter; it's about how each interprets formatting constraints. The takeaway is that detailed, structured prompts narrow the gap between what you ask for and what you actually get.

SECTION 5

Final Resume

The following page contains the final, polished one-page resume. Minor edits were made to wording and bullet specificity after reviewing both model outputs. The layout and design follow the original prompt specifications.

Eman Torr G. Berjame

emantorrberjame@gmail.com | 0908 715 9548 | Davao City, Philippines

PROFILE

Detail-oriented Information Technology student with hands-on experience building responsive web applications using modern JavaScript frameworks. Skilled in React.js, Tailwind CSS, and REST API integration, with solid foundations in OOP and agile teamwork.

EDUCATION

Ateneo de Davao University <i>BS Information Technology</i>	2023–Present
Philippine Nikkei Jin Kai International School <i>Senior High School</i>	2021–2023
Philippine College of Technology <i>Junior High School</i>	2017–2021
San Roque Central Elementary School <i>Elementary</i>	2012–2017

SKILLS

Languages & Frameworks

HTML5, CSS3, JavaScript (ES6+), React.js, Bootstrap, Tailwind CSS, Python, Java

Databases

MySQL, Firebase

Soft Skills

Agile teamwork, Problem-solving, Attention to detail

Tools

Git, GitHub, VS Code, Figma, Chrome DevTools, npm, Vite

Concepts

Responsive design, REST APIs, OOP, Debugging

PROJECTS & EXPERIENCE

AdDU Cateneo — Front-end Developer

SAMAHAN, Ateneo de Davao University

- Built interactive UI components using React.js and Tailwind CSS, improving consistency across device sizes.
- Integrated RESTful APIs for real-time dynamic content, enabling live updates for student-facing features.
- Collaborated in agile sprints, contributing to code reviews and delivering features on schedule.

AdDU Echoes Website — Web Developer

Personal/Academic Project

- Converted Figma prototypes into pixel-perfect HTML/CSS/JS layouts with full cross-browser compatibility.
- Applied responsive breakpoints to ensure consistent UX across desktop, tablet, and mobile viewports.

Genshin Impact Quiz Game — JavaScript Developer

Personal Project

- Built an interactive quiz using Vanilla JS with DOM manipulation for dynamic question rendering and scoring.
- Engineered countdown timer logic and result transitions, delivering a smooth experience without any frameworks.
